Seasoned product management professional with 4+ years of experience in the healthcare industry, including roles focused on healthcare IT and electronic health records (EHR) systems. Skilled in developing data-driven insights, leading cross-functional teams, and aligning product delivery with clinical requirements.

WORK EXPERIENCE

Product Manager

Chicago, IL

The Aspen Group - Aspen Dental

May 2025 - Present

- Promoted to Product Manager after 5 months for leading the turnaround of a critical internal office software product used across 1,200+ care locations
- Led a cross-functional Scrum team, managing the product backlog and prioritizing features to align delivery with business objectives and clinical requirements
- Oversaw the development of dashboards and operational widgets for both administrative and clinical users, enhancing patient appointment management, patient retention, and regulatory compliance tracking
- Delivered data-driven insights through Tableau dashboards and Google Analytics, providing leadership with performance visibility and product usage metrics
- Partnered with stakeholders including compliance officers and clinical leadership to ensure adherence to healthcare standards and reduce risk exposure
- Implemented real-time compliance monitoring tools that mitigated potential penalties of up to \$10,000/day per location

Business Analyst (Prior Role)

Chicago, IL

The Aspen Group - Aspen Dental

Jan 2025 - May 2025

- Created a foundational product roadmap addressing key gaps in compliance, user experience, and reporting
- Conducted in-depth discovery to identify root causes in a struggling software initiative, with a focus on clinical workflow support and data integrity
- Collaborated cross-functionally to ensure that office-facing tools supported clinical compliance workflows and operational efficiency, aligning with healthcare regulatory standards
- Provided feedback on data tracking design, implementation logic, and workflow usability, drawing on prior consulting experience as a data visualization engineer

Data Analyst (Contract)

Manchester, NH

Eastern Industrial Automation

Feb 2024 - Jan 2025

- Designed reusable Power BI dashboards to evaluate website taxonomy and product performance, enabling data-driven product category decisions.
- Partnered with senior executives to translate insights into actionable strategies, directly influencing product positioning and revenue growth.
- Developed optimized SQL queries to enhance reporting efficiency and data accessibility for cross-functional stakeholders.
- Identified under performing categories and recommended strategic adjustments that increased sales by 18%.

Data Visualization Engineer

Chicago, IL

NTT Data Services

Jul 2022 - Nov 2023

- Negotiated project priorities and deliverables with executive stakeholders (SVPs), aligning analytics outcomes with business goals.

- Developed process-mining dashboards on ITSM workflows, uncovering inefficiencies and driving cost savings exceeding \$2.5M.
- Directed and trained offshore teams, ensuring sustainable support for client data products and visualizations.
- Led client-facing data initiatives using Scrum, delivering analytics solutions for a global airline and entertainment company on time and within scope.
- Delivered internal training on visualization best practices, elevating team capability and ensuring consistent product quality.
- Executed comprehensive data management and configuration tasks, optimizing client data for accurate analysis and reporting by utilizing Celonis, SQL, and PQL.
- Optimized client data through Celonis, SQL, and PQL configurations, ensuring accuracy for product reporting and strategic decision-making.

Finance Data Analyst (Contract)

Indianapolis, IN

Roche Diagnostics

May 2021 - Aug 2021

- Developed a Tableau dashboard adopted enterprise-wide, providing consistent visibility into financial performance from VP to analyst.

Data Research Analyst (Part-Time)

West Lafayette, IN

Purdue University

Nov 2019 - May 2022

- Collaborated with hospital personnel and internal teams to ensure accurate interpretation of findings, improving cross-disciplinary alignment.
